

Cubicle Curtain Track

PRODUCT
INFORMATION

Goelst 4100

Goelst G-Rail 4100 is a top quality Cubicle Rail for room dividing and privacy in the healthcare sector which conforms to HTM66 and offers a comprehensive range of accessories to suit all fixing possibilities and multi bed installations.

Synthetic wall and ceiling fittings allows the rail to comply with the European NEN-3134 standard for special care rooms requiring anti-static facility.

The track is an extruded aluminium profile finished satin silver anodised or powder coated white RAL 9010 with special colours available on request. The track can be bent to a minimum radius of 20cm.

As well as the standard glider hooks, end stops and dust cover the track is available with a wide range of components to facilitate fixing in varying circumstances and configurations.

G-Rail systems are suitable for wet areas, shower rooms and plaster rooms etc.

Full technical information on both the standard 4100 system and the Load Release System is available on request.

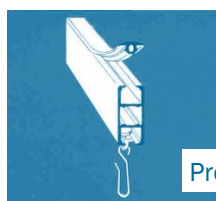

Anti-ligature Load Release System

Developed by Goelst for use with the 4100 rail is the unique, patented anti-ligature load release system to protect against and reduce the risk of attempted patient self harm.

The system allows the rail to release in a controlled manner when incorporated with the cubicle rail.

The Load Release System allows for normal use but will separate at the load release suspension points when the calibrated control load is reached, providing a controlled system collapse.

The system has been designed to activate at an applied load of 35kg (plus or minus 2Kg).

Profile 4100 cubicle curtain track.
