

Harol BX 260 Foldaway Awning

PRODUCT
INFORMATION

Sleek cassette suitable for domestic and commercial applications.

Stylish modern full cassette developed from the traditional rectangular design.

Strong folding arms plus outstanding design and engineering allow this awning to be manufactured in larger sizes.

Renowned Harol design and engineering, with aluminium profiles and castings.

Harol undertake extensive quality testing, the folding arms, for example, are tested to carry out 20,000 movements.

Operation

Manual by using a detachable crank handle locating on a gearbox eye or electrically operated.

Electrically operated awnings utilise a tubular motor located in the awning roller. Advances in electrical control now mean that the only wiring required is to the awning motor in the roller tube.

The blind can then be operated by a remote control unit or a stand alone wall switch that requires no wiring.

Electrically operated awnings can be provided with sun & wind sensors which control the blind automatically depending on the light intensity and wind speed.
