

Harol CA 430 Foldaway Awning

PRODUCT
INFORMATION

Superb Awning for larger residential and commercial applications.

Full Cassette is heavy duty, functional but elegant with an up to date oval style shaped cassette.

Operation

Manual by using a detachable crank handle locating on a gearbox eye or electrically operated.

Remote control awnings utilise a tubular motor located in the awning roller. Advances in electrical control now mean that the only wiring required is to the awning motor in the roller tube.

Electrically operated awnings can be provided with sun & wind sensors which control the blind automatically depending on the light intensity and wind speed.

The CA 430 can also incorporate the **Storelight**, for lighting or combining both lighting and heating again operating from the remote control unit.
