

Harol LX 530 Foldaway Awning

PRODUCT
INFORMATION

Luxurious top of the range awning with Full Cassette.

Suitable for domestic and commercial Applications with Square Bar for strength and rigidity

Operation

LX 530 Awnings are only supplied with electrical operation, utilising a tubular motor located in the awning roller.

Advances in electrical control now mean that the only wiring required is to the awning motor in the roller tube.

The blind can then be operated by a remote control unit or a stand alone wall switch that requires no wiring.

Variovalance

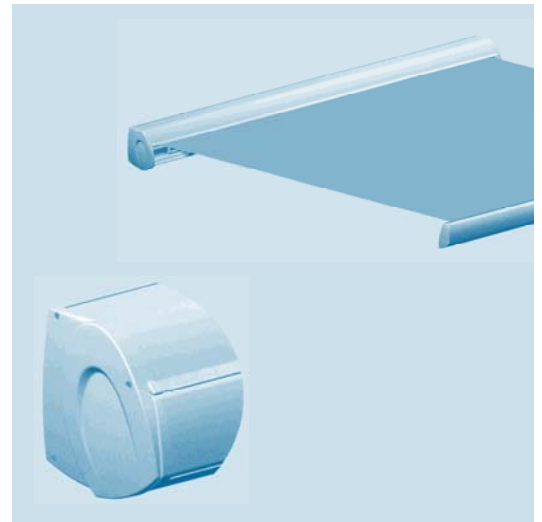

LX 530 Awnings can be supplied with a variovalance. This is an additional valance(concealed behind the standard valance), electrically operated to drop down by up to 1.5 Metres, giving protection against low sun.

Heating and Lighting

These awnings can incorporate a Storelight unit. This can be for lights or lights plus heating all operated from the remote control unit.

Electrically operated awnings can be provided with sun & wind sensors which control the blind automatically depending on the light intensity and wind speed.

Standard Colours for framework

RAL 9016 White RAL 8019 Brown
